

## Giant Pacific Octopus

By Felix Zhang

## Giant Pacific Octopus Description

A Giant Pacific Octopus is very hard to spot on coral due to its great camouflage. It's got the same appearance as a normal octopus; eight tentacles, two eyes, one beak, one head and 80 suckers.

## Giant Pacific Octopus Location

A Giant Pacific Octopus lives in the northern Pacific Ocean and migrates to the Arctic Ocean.

## Giant Pacific Octopus Diet

A Giant Pacific Octopus eats crab, fish, cuttlefish, shrimp and cray.
